Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-8, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over either one of Holmes, et al. (US 4,094,236), Hirschson (GB 472,428), or Leich, et al. (US 1,232,576). The prior art references disclose the claimed invention except for the control means which acts on a pivot whereon there is keyed a circular sector provided with two pivots that rotate a toothed sector and a compensator both rotating around the pivot of the circular sector. It would have been an obvious matter of design choice to have the control means act on a pivot whereon there is keyed a circular sector provided with two pivots that rotate a toothed sector and a compensator both rotating around the pivot of the circular sector, since applicant has not disclosed that such a design choice solves any stated problem and it appears that the invention would perform equally well. Further, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have designed the prior art references with "two" dispensers as opposed to one, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.
